1. INTRODUCTION

1.1 PROLOGUE

In today's life everyone is busy with their work and sometimes they don't have enough time to visit stores or meet the person who can solve their issues.

So, we are here.

Our motto will help you to bring

YOUR IMAGINATION TO YOUR DOORSTEP.

1.2BACKGROUND AND MOTIVATIONS

This website will help you to get your daily needs at your doorstep. Even small to small services are available in it.

In this website you will be getting services like:

- Transport/Courier Service
- Product Delivery
- Grocery
- Technical Helper/ Adviser
- Electrician
- Cleaner
- Gardening
- Baby Sitting
- Food Order
- Event Management
- Healthcare/ Nursing
- Home Tutor
- Mechanical Helper/ Adviser

2. PROPOSED SYSTEM

2.1 ADVANTAGES

This website helps customers to

1. Single Point of Contact for the Entire Delivery

They do not need to maintain checks and balances at every stage of the shipment transfer. This means they only need to contact or add items to their "door2door services-delivery" account and confirm shipping.

2. Added Advantage of Insurance

With door-to-door delivery, the shipping provider also provides you with insurance for damaged and lost goods. Enquire about this with your delivery partner and ask if you need to activate it before, will they enable it automatically for every shipment

3. Reduced Costs

Door-to-door delivery does not require you to spend any additional costs at every stage of the fulfillment process. All the processes starting from the dispatch of products from your warehouse to the delivery of the product to the end customer, everything is done at one go. Therefore, customers do not need to arrange for any first-mile or last-mile delivery separately.

4. Decreased Operational Efforts

They do not have to waste time or efforts on resource and fleet management for logistics. You can spend this time on your core business, product development, etc.

With door-to-door delivery service, you can align resources toward marketing and sales of your product and overlook the entire logistics process.

5. Easier to Manage

3.2 SECURITY

3.2.1 Use complex passwords

On registration make sure user's passwords are at least eight characters long, with a mix of upper and lower case, and include numbers or other characters, and never use the auto-complete feature for passwords.

3.2.2 Store passwords in encrypted format

Use Crypt hashing function

- This is to prevent rainbow table attacks which can reverse hashed passwords
- using common hashing functions that do not utilize a salt.
- Uses Hashing algorithms that are one-way functions.
- They turn any amount of data into a fixed-length “fingerprint” that cannot be reversed.

3.2.3 Use two-factor authentication.

Verify user by email-validation.

3.2.4Captcha

It determines whether the user is real or a spam robot.
CAPTCHAs stretch or manipulate letters and numbers, and rely on human ability to determine which symbols, they are.

3.2.5 Manage cookies
